Queries and its results

The screenshot shows the QGIS interface with the 'Select by Attributes' dialog box open. The dialog is configured to select features from the 'Campsites' layer based on the expression 'TYPE = 1C2'. The 'Where' clause is set to 'SURVEY is equal to GPS' and the 'Or' clause is set to 'TYPE is equal to Stock'. The 'Apply' button is highlighted. The background shows a map of a river area and a table of campsite data.

OBJECTID	Shape	SURVYDAT	NAME	TYPE
1	Point	18/07/1997	1A1	Foot
